

# CIT 230 Final

## Project

**15 points + 5 point(Presentation)**

In a group of (4 students max) You are required to design a website that has the following:

**\*\*\* Project SHOULD be created from scratch; predesigned Templates are not accepted\*\*\***

- 1- At least 6 pages. One of them is the group members information. **( 2 point )**
- 2- One of the pages has to have a form to contact you (contact us form). **( 2 points )**
  - a. The Form should have some validating criteria such as (email validation)
  - b. You need to use multiple types of text input, with a consideration of using ( placeholder, pattern attributes )
- 3- The website should have the following elements **( 3 points )**
  - Table
  - lists
  - Images
  - Video
  - Buttons
  - Navigation bar
- 4- Using multiple CSS styles (attributes) to show your ability to use CSS **( 2 point )** effectively.
  - The website needs to have external + internal + inline CSS.
  - CSS should have at least 1 class, and 1 ID.
- 5- Group members page should display their names randomly with each update to the page. (Hint: use list + JS.) **( 2 point )**
- 6- The website should be a responsive website. **( 2 point )**
- 7- The website should be uploaded to a server. ( any free server) **( 1 point )**
- 8- The overall design. **( 1 point )**

### The projects delivery

Include all files in one folder and send it as (Rar ,OR Zip ) format on blackboard with adding the link to your website in the comment section. (One student for each group)
